Office: 003 – 0407A
OH: TBD

I will post course notes and readings to go along with lectures. The following texts are useful references but not required:

Other Reference Texts (not required):

Andreu Mas-Colell, Michael D. Whinston, and Jerry R. Green *Microeconomic Theory*

David M. Kreps *A Course in Microeconomic Theory*

Ariel Rubinstein *Lecture Notes in Microeconomic Theory: The Economic Agent*
Available on the web at: http://press.princeton.edu/rubinstein/

I. Course Content

Economics 511 addresses microeconomic foundations of individual decision-making, which is necessary to interface with the economics literature and do informed empirical work in economics. The course examines in detail the theory of consumer choice, the theory of the firm, and fundamental concepts in Game Theory. These theories are the backbone of a professional economist's approach to market data. Economics 511 fits with the strategic plan of the MS in Economics degree program to train students for technical careers in the Economics profession.

The primary learning outcomes are: (i) to comprehend the theories of firms, consumer behavior, and markets; and (ii) to be able to apply these theories to evaluate market behavior in a variety of industry settings.

II. Grading

20% Problem sets
10% Projects
30% Midterm Exam
40% Final Exam (Comprehensive)

III. General Policies

If you need assistance with the material, I am more than willing to help. It is your responsibility to approach me for help. Office hours are designed for this purpose.

No make-up exams will be given unless prior permission is obtained. This will only be done for extenuating circumstances. Students who miss an exam will receive a zero.

Accommodations will be made for students with documented disabilities. Please inform me of this no later than the end of the second week of class September 4th. For more information, visit http://drc.calpoly.edu/index.html.

Cal Poly does not tolerate academic dishonesty. Please visit http://www.academicprograms.calpoly.edu/academicpolicies/Cheating.htm for a complete description of the university policy.
