

Team Name: Team 3

Members: Daniel T, Alistair K, Mathew S, Sam, W

Project: Paper Replication

Paper: “Non-Market Values in a Cost-Benefit World: Evidence from a Choice Experiment.”

Project Goal: Replicate the paper as accurately and transparently as possible. Produce professional grade deliverables for the client.

Roles:

- Point of Contact: Sam W.
- Data Analysis Lead: Alistair / Matthew
- Writing/Presentation: Daniel / Sam
- Note-taker/Organizer: Daniel

How we communicate:

- In person meetings
- Group chat/text
- Trello (see below)

How we make decisions:

- Big decisions are decided by majority vote
- Domain specific decisions are made by the relevant team member
 - Must keep track of every decision made and immediately inform team members if the decision effects their part of the work
- Workflow decisions made upstream with clear identification of tasks from the outset.

Task Management and Development:

- Utilizing of Trello or like process / task mgmt technology
 - Establish owners
 - Triage task flow and where owners are connected and transitive
 - Definitive deliverable due dates
- Clarity on goal and sub-goals attached to total deliverable
- Eisenhower's importance matrix
- Cross-disciplinary check-ins between the groups
- Data analytics processed and organized in a github repository
 - <https://github.com/matthewstar05/ECON5560-Team3>
 - Pull requests and peer reviews for empirical content

If someone doesn't deliver:

- Check in with them directly first
- In case of no response within 48 hours:
 - Discuss with team and reassign work if necessary
- Continued absence? Notify faculty.

How we'll handle disagreement:

- Address disagreements early in the presence of entire group
- Remain respectful

AI Policy:

- AI can be used as research or coding assistant but all AI outputs must be verified by a team member.
- Any significant use of AI is noted per course policy when the final paper is submitted
